

### Warm Up 3.8H

Name \_\_\_\_\_ Period \_\_\_\_\_

1. Calculate the change between the  $f(x)$  values in the table and list them along the side of the table.

$x$	$f(x)$
2	7
3	15
4	20
5	31

2. What is the average change of  $f(x)$  on the interval  $x = 2$  to  $x = 5$  ?

3. What is the average change of  $f(x)$  on the interval  $x = 3$  to  $x = 5$  ?

4. Calculate the change between the  $g(x)$  values in the table and list them along the side of the table.

$x$	$g(x)$
1	3
2	6
3	12
4	24

5. What is the average change of  $g(x)$  on the interval  $x = 1$  to  $x = 4$  ?

6. What is the average change of  $g(x)$  on the interval  $x = 2$  to  $x = 4$  ?

7. Find both the slope (linear) and the multiplicative ratio (exponential) for the coordinates (3, 9) (8, 879).
