

## Ready, Set, Go!

### Ready

Topic: Solve exponential equations

Find the value of  $x$  for each situation.

© 2012 www.flickr.com/photos/dugspr

1.  $2^x = 8$

2.  $3^x = 27$

3.  $2^x = 4$

4.  $(-2)^x = -8$

### Set

Topic: Create and solve two variable inequalities

5. Jane is buying fruit salad and potato salad for a picnic. Fruit salad costs \$2.00 per pound and potato salad costs \$4.00 per pound. Jane needs to buy at least 6 pounds of salads and she doesn't want to spend more than \$20. Write and graph a system of linear inequalities.

Let  $x$  = pounds of fruit salad.

Let  $y$  = pounds of potato salad.

List 2 possible combinations of salad that Jane could buy.

### Go

Topic: Find the solution region of the following systems of inequalities.

Graph each set of inequalities and determine the solution region

$$x - y < -6$$

6.  $2y \geq 3x + 17$

$$4y - 5x < 8$$

7.  $-5x \geq 16 - 8y$

$$5x - y \geq 5$$

8.  $2y - x \geq -10$

$$5x + 2y \geq -25$$

$$3x - 2y \leq 17$$

9.  $x - 6y \geq 27$

$$2x - 3y \leq 21$$

$$x + 4y \leq 6$$

10.  $3x + y \geq -4$

11. Write the inequalities that would create the graph below.
