## Warm-up 2.2H

1. For the given function, complete the table and then write the recursive rule that goes with it.

| $g(x)=2\left(3^{x}\right)$ |
| :--- |
| x |
| 0 |
| 1 |
| 2 |
| 3 |

2. For the given recursive rule, complete the table and write an explicit function that goes with it.

$$
N e x t=N o w+3
$$

| x | $f(x)$ |
| :---: | :---: |
| 0 |  |
| 1 |  |
| 2 |  |
| 3 |  |

3. Write a recursive rule and an explicit function that corresponds with the given table.

| x | $h(x)$ |
| :---: | :---: |
| 0 | 4 |
| 1 | 10 |
| 2 | 16 |
| 3 | 22 |
